ILLUSIONS4REAL is a leading Energy Saving Solutions provider. At I4R, we aim to build a green future for our global community by utilizing the energy of the Sun. With a growing network of partners across India, we are committed to offer quality solutions at reasonable prices in stipulated time frame. We keep in mind that our consumers are Green Citizens and their initiative to go in for an energy saving solution should not be neglected. We strongly believe in and recommend the use of non-conventional sources of energy and encourage even a small step that goes into energy saving. In today's high-energy consuming times, we offer world-class energy saving solutions, striving to meet the increasing need for alternative energy sources.

Did you know?

Vacuum tube technology (a.k.a. Evacuated Tube Technology - ETC) is the world's most widely accepted technology for solar water heating. Tried and tested for years now, the evacuated tube systems are a boon to promote the use of solar energy. These are maintenance free systems that boast of a long life span and fall within the consumers' budget. Here the heat loss to the environment, inherent in flat plates, is at its minimal. Since two flat sheets of glass are normally not capable enough to prevent heat loss, the vacuum is rather created between two concentric tubes making the vacuum tube systems more efficient.

SolarMaxx Solar Water Heating

SolarMaxx is a leading Solar Water Heating solutions provider spreading its wings rapidly across the nation. SolarMaxx Solar Water Heating systems are built around the revolutionary Evacuated / Vacuum tubes technology. These vacuum tubes help raise the water temperature faster even during partially cloudy or foggy conditions.

SolarMaxx Solar Water Heating solutions go through standard quality checks and approvals of the highest order. Most of our products are tested and approved by the Ministry of New & Renewable Energy, Govt. of India, TUV Germany and CE. Our manufacturing facilities are accompanied with several technicians, engineers and consultants in addition to a full research & development staff. We cater to residential, commercial as well as industrial water heating needs.

SolarMaxx offers industry's most complete & latest line of Solar Water Heating

Non-pressure solar water heating for residential and commercial use

- 1800mm 58mm borosilicate vacuum tubes
 - Stainless Steel inner manifold
 - Polyurethane Foam Insulation
- Galvanised Steel stand & structure
 - Unique assistant tant
 - In-built electric power back-up

Pressurised solar water heater with heat exchanger for residential and commercial use

- 1800mm 58mm borosilicate vacuum tubes
 - Insulated hot water tank
 - In-built heat exchanger
 - In-built electric power back-up

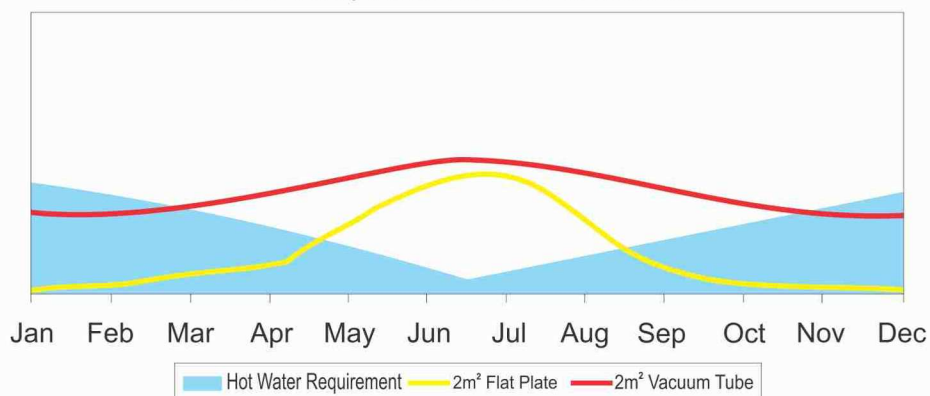

Solar water heating industrial manifold for commercial and industrial use

- 1800mm 58mm borosilicate vacuum tubes
 - Stainless Steel inner manifold
 - Polyurethane Foam Insulation
- Galvanised Steel stand & structure

Why SolarMaxx?

- Latest Technology Solar Water Heating • SAVE thousands on electricity, gas, coal, diesel or wood bills
- Provide for almost all of your hot water needs • Save tonnes of greenhouse gas emissions every year
- Hot Water all the time at Higher temperature • Long-life and Maintenance-free • Environment-friendly
 - Negligible operating costs • Quick pay-back-period • Reasonable prices
 - Avail government subsidies, tax benefits and electricity bill rebates *
 - Enjoy long warranty period and prompt quality service

Consistent performance of ETC in all seasons

Latest Technology Vacuum Tube (ETC) Vs Flat Plate Collectors (FPC)

A promise of quality and service
